Record Books found in the Broughton Hospital Archives

The first to record/log books have one page per individual student detailing the dates they attended the school the number and type of lectures they attended, their grades and any "remarks" the nursing director felt needed to be recorded (sickness, dismissal for cause etc)

1. Book 1 1895-1900 "Record of Training School State Hospital" [nursing school]

2. Book 2 1900-1908 "Record of Training School State Hospital" [nursing school]

3. Log book 1957-1980 showing when students signed out and back in of the nurses dormitory at Broughton and where they signed out to

4. Log book of "a permanent record of all important happenings in the Nurses home" 1966-1970.

Entries concerned repairs, staff changes and other misc items

5. 2OF" log book - I don't think we can use this because it is a log book of nurses notes of the 2OF section of Broughton from June-Dec of 1994 and has records of each patient by name with vital signs, diagnosis etc
